NOTES/COMMENTS:

Dear Mr. Glenn Richman,

Our correspondence address was changed to 8275 South Eastern Avenue, Suite 200, Las Vegas, Nevada 89123 in 2005 and USPTO confirmed the change on June 16, 2005. The Office Action of Application No. 10/668,268 was found on the website of UPSTO today. However, we have not received the Office Action mailed on August 22, 2006 addressed to the former address. Thus, we hope the period of reply of one month could start from today.

Regarding this action, here below are some informal consultations.

1. In this action, Claim 1-6 and Claim 7-10 are two distinct inventions and "the process as claimed can be practiced by another and materially different apparatus or by hand". While in our opinion, Claims 1-10 are closely related and could not be separated. The process includes simulated motion, rotary wheel inspection, speed detecting and dynamic scene display. The process is realized through the apparatus. The apparatus includes bicycle, direction detector, the speed detector and damp force device, computer system and display system. The apparatus is practiced by this process. We don't think that the process as described in Claim 1-6 can be practiced by another and materially different apparatus or by hand, nor did the apparatus as described in Claim 7-10 can be practiced by another and materially different apparatus or by hand. You are appreciated that if you can give us some examples showing other apparatus that can practice the claimed process or different process that can practice the apparatus as stipulated in MPEP 806.05(e).
2. In this action, Claim 1-6 is classified in class 434 and Claim 7-10 is classified in class 482. As stated in the Abstract of this application, the invention brings full fun of striding over different scenes, as well as a kind of exercise effect. From our point of view, Claim 1-10, as a whole invention, belongs to class 482 or class 472. We would like to know whether we are required to select one class for the invention or the invention can be classified in two classes such as class 482 or class 472.

Other inventors and I are both in China. Therefore it is difficult for us to communicate with you by telephone due to time difference. You can reach me by email and fax. Please email me at niml@hytch.com and CC to daisy@hytch.com or send fax to me at (86) 755 8375 9700.

Thank you

Ming Li
